Nithesh Kumar M S

MSRIT 26 |Web Developer | Flutterflow, Dart, Java
Bangalore Urban, Karnataka, India

Summary

I am a web developer at CodSoft, a leading software development company that provides innovative and customized solutions for various industries and domains. I design and build responsive and user-friendly websites using Flutterflow, Dart, and Java, leveraging my certification in CSS from Udemy and my proficiency in HTML, JavaScript, and Bootstrap.

I am also passionate about artificial intelligence and machine learning, and I am pursuing my Bachelor of Engineering degree in these fields at Ramaiah Institute of Technology, one of the top engineering colleges in India. I have completed multiple projects and assignments using Python, TensorFlow, and PyTorch, and I am eager to apply my skills and knowledge to real-world problems. As a team player, a fast learner, and a creative thinker, I always strive to deliver high-quality work that meets the needs and expectations of my clients and users. My goal is to become a skilled and versatile web developer who can create impactful and intelligent web applications.
